DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claim 15 have been considered but are moot in view of the new ground of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claim 15,23-24 and 37 are rejected under 35 U.S.C. 102(e) as being anticipated by Brilla et al. No. 6,389,276, newly discovered.

Regarding claim 15, Brilla discloses a method of providing access to a specific message stored on a message server, comprising:

generating a unique message pointer (i.e., TAP paging message, including an access number and the text of the message to be displayed) associated with said specific message stored on said server (e.g., voice mail platform) (col. 16, lines 16-21) ; and

Art Unit: 2681

sending said message pointer (i.e., via the MWI controller) to at least one given subscriber's address (i.e., E-mail address and the portable number (if needed)) (col. 16, lines 28-49) ;

wherein said at least one given subscriber may use said message pointer in combination with a subscriber's address identifier associated with said at least one given subscriber to enable access to said message without having to input any additional data (i.e., "instantly access the stored voicemail message") (col. 16, lines 54-67).

Regarding claim 23, Brilla further discloses a method according to claim 15, wherein said unique message pointer (i.e., TAP page message) is further associated with a specific subscriber from said at least one given subscribers (col. 16, lines 16-21).

Regarding claim 24, Brilla further discloses a method according to claim 23, wherein said generating further comprises, inherently for each (i.e., selected mobile unit) of said at least one given subscribers, generating a unique message pointer (col. 16, lines 16-21 and lines 59-62).

Regarding claim 37, Brilla disclose a method of providing access to a specific message stored on a server, comprising:

linking (i.e., via translation table) a message stored on said server with a first specific network address associated with said specific message and further associated with a given subscriber (col. 16, lines 15-21 and lines 28-35);

sending said specific network address (i.e., E-mail address and portable number) to said given subscriber's address (col. 16, lines 36-48); and

Art Unit: 2681

using said first specific network address to initiate a communication session with said communication device at said first specific network address (col. 16, lines 249-59);

wherein upon the identification of said given subscriber's address, access to said stored message is provided without having to input any additional data (col. 16, lines 59-67).

Allowable Subject Matter

4. Claims 25-36 and 38-46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
